

## **Global Health & Pharma Limited has Awarded XSTREAM Infection Control LLC. “Most Trusted Infection Solutions Provider – USA”**

January 9, 2023 – Global Health & Pharma in their 8<sup>th</sup> Annual Biotechnology Awards has selected XSTREAM Infection Control LLC to receive the “Most Trusted Infection Solutions Provider – USA” award for 2022. This award recognizes and rewards innovative, forward-thinking businesses and professionals within the global Biotechnology sector.

XSTREAM has been a forerunner in the infection control industry since 2009. Years of testing and installation have gone into the development of this technology with proven results of bacteria, virus and VOC free environments. XSTREAM has the most advanced testing and validation of their product in the world utilizing SEM (Standardized Electron Microscopes) at the University of Arizona under the auspices of Dr. Kelly Reynolds, PhD., Department Chair.

Based on the universal requirement for infection control the company, along with its strategic partners, have developed and implemented major systems throughout the United States.

XSTREAM has entered into strategic partnerships with: Graywolf, Hygiena, Johnson & Johnson, ThermoFisher and Kaiterra to integrate their advanced monitoring technology with XSTREAM Infection Control units to provide a complete system. This is a critical advancement as people want to know their space is safe for occupants and free of bacteria, viruses and VOCs.

The company is now expanding internationally to combat the world-wide problem of life-ending infections and will be adding equity partners to enable its expansion.

XSTREAM Infection Control’s Version 5 is due to be released June 2023. Key components within the advanced system are patented.
